PROFESSIONAL SUMMARY

IT support professional with nearly three years of experience at the Cyril Ramaphosa Foundation, progressing from IT Intern to Service Desk Analyst. Holds a Bachelor of Computer Information Systems, with practical experience in Microsoft 365 administration, identity and access management, endpoint protection and cloud migration support. Developing a Blue Team specialism through a documented cybersecurity homelab. Targeting Junior SOC Analyst and Cybersecurity Analyst roles focused on security monitoring, incident investigation, network defence and cloud security.

PROFESSIONAL EXPERIENCE

Founder & Director

Tech Port | February 2025 - Present | https://techport.co.za

- Founded and direct a registered IT services business providing technical support, hardware repairs, website development and technology consulting.
- Deliver client websites and e-commerce solutions using WordPress, Elementor and WooCommerce; configure PayFast payments, SSL and web application firewall settings.
- Manage client requirements, quotations, maintenance agreements and service delivery; troubleshoot systems and maintain client websites and digital services.

Service Desk Analyst

Cyril Ramaphosa Foundation | June 2025 - May 2026

- Resolved escalated hardware, software, Microsoft 365 and connectivity incidents; maintained IT service management records and coordinated escalation within agreed service levels.
- Administered Microsoft 365 services, licensing, Exchange Online, SharePoint, OneDrive and Teams; managed user accounts, permissions, onboarding and offboarding.
- Supported Microsoft Intune enrolment, device compliance checks, multi-factor authentication resets, Sophos endpoint protection and VPN access.
- Contributed to cloud migration and infrastructure changes with Smart Technology Centre, including Microsoft 365, SharePoint Online and OneDrive adoption.
- Supported RAM upgrades, office relocation, IT asset reviews and server backup and disposal activities; documented procedures and communicated progress to stakeholders.

IT Intern

Cyril Ramaphosa Foundation | July 2023 - May 2025

- Provided frontline support for Windows and macOS devices, applications, printers and peripherals; diagnosed hardware faults and network connectivity issues.
- Configured workstations and supported Active Directory accounts, permissions, Microsoft 365 services and remote access using VPN and Remote Desktop Protocol.
- Assisted with cloud migration, endpoint security and technical documentation while developing troubleshooting skills through training and mentorship.

CYBERSECURITY PROJECTS

Enterprise Cybersecurity Homelab

Independent project | 2026 - Present

- Built a two-node Proxmox lab with Windows and Linux virtual machines, pfSense and OPNsense firewalls, and VLAN segmentation. Configured Windows Server DHCP for a dedicated VLAN.
- Deployed Wazuh and endpoint agents, reviewed security events and troubleshot agent connectivity, storage and log collection issues. Configured pfSense rule logging and remote syslog; investigated gaps in Wazuh ingestion.
- Ran Nmap reconnaissance from Kali Linux against an Ubuntu server hosting vulnerable Docker applications. Documented exposed services and mapped the exercise to MITRE ATT&CK T1046.
- Installed Security Onion and MITRE Caldera for network monitoring and adversary emulation learning; documented installation, firmware and service persistence issues.
- Hosted Ollama and Open WebUI on Ubuntu and connected the host to Wazuh for baseline monitoring as groundwork for AI security experiments.
- Completed beginner Hack The Box exercises and maintained a technical portfolio of lab builds, network design, troubleshooting, evidence and lessons learned.

TECHNICAL SKILLS

Security monitoring: Wazuh SIEM, syslog, firewall logs, Sophos endpoint protection; lab exposure to Security Onion, Zeek and Suricata.

Security testing in the lab: Reconnaissance and vulnerability assessment; Kali Linux, Nmap, Nessus, MITRE Caldera, MITRE ATT&CK, Metasploitable2, Hack The Box, vulnerable Docker applications.

Networks and infrastructure: pfSense, OPNsense, Proxmox VE, Docker, Portainer, VLANs, TCP/IP, IPv4/IPv6, DNS, DHCP, VPN, Tailscale, Windows Server, Windows 10/11, Ubuntu, Linux Mint, macOS.

Microsoft and identity: Microsoft 365, Exchange Online, SharePoint, OneDrive, Teams, Intune, Active Directory, Microsoft Entra ID (Azure AD), Group Policy, MFA, CodeTwo.

Development and data: C#, Python, PowerShell, SQL, JavaScript, HTML/CSS, .NET, ASP.NET, Blazor, Entity Framework Core, React, Tailwind CSS, SQL Server, Power BI.

Web and supporting tools: WordPress, Elementor, WooCommerce, PayFast, Git/GitHub, VS Code, draw.io, Ollama, Open WebUI, ITSM ticketing.

EDUCATION AND CERTIFICATIONS

Bachelor of Computer Information Systems

University of the Free State | 2018 - 2022

Oracle University | 2025: Oracle Cloud Infrastructure Foundations (Associate); Oracle Cloud AI Infrastructure Foundations (Associate).

British Columbia Institute of Technology | 2023: Essentials of Network Addressing and Services; Essentials of Network Terminology and Protocols.

NoviaOne Business School | 2025: Business Analysis for Innovation and Transformation.

PROFESSIONAL DEVELOPMENT

In progress: Cybersecurity Operations coursework (BCIT); CompTIA Security+ self-study; Google IT Support coursework; Transactional Banking (NoviaOne, 2026).

Additional learning: IT Training Programme, Smart Technology Centre (2023 - 2024); AWS Summit 2026 session on Red Team vs Blue Team in the AI Era.
